-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

FINAL REJECTION

CLAIM REJECTIONS

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-6 remain rejected under 35 USC 102 (b) as being anticipated Silverbrook (US Pat. 6,347,864).

Note: The method steps are inherently taught in the apparatus device/limitations in the rejections as follow:

Silverbrook discloses in Figures 1-10 a print engine comprising:

- a printing fluid storage within a print cartridge (504);
- a printhead (516) in fluid communication with the printing fluid storage (504);
- an assembly (522, 526, 528, 518) arranged to direct air over the printhead (516), the assembly including a filter (738) (Figs 1-10, column 4, lines 53-57);

wherein the assembly includes an inlet (526) for receiving air from a source (522) located in the inkjet printer (500); and

- wherein the printhead (516) comprises a pagewidth printhead (Figs. 5-7).

Response to Applicant's Argument

The applicant argues at page 2 of the amendment that the cartridge (504) of Silverbrook does not have an printhead or an assembly with air filter. The arguments are not persuasive

because Figure 5 of Siverbrook shows that the element (516) is the printhead and the element (738) in Figure 10 is the filter. The printhead (516) and the filter (738) are accommodated with the print cartridge (504), see column 4, lines 55-60.

The applicant argues that the print engine (500) of Silverbrook is not a cartridge for installation and removing from an inkjet printer. The argument is correct since the print engine (500) is the printer. However, the print cartridge is the element (504), which is removable mounted on the print engine (500), see column 2, line 28. Also, the limitation "a removable printer cartridge" as recited on line 1 of claims 1 and 4 is considered to be a preamble which is not given a patentable weight.

CONCLUSION

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
